Prompt Engineering

Prompt

Generative Pretrained Transformer (GPT): rete neurale generativa pre-addestrata.

Il modello è addestrato su testi provenienti da diverse fonti, impara le strutture linguistiche, il significato e il contesto delle parole di una data lingua (impara a «capire» il linguaggio umano).

Per interagire con il modello è necessario formulare degli input testuali, noti come i prompt per ChatGPT.

Prompt

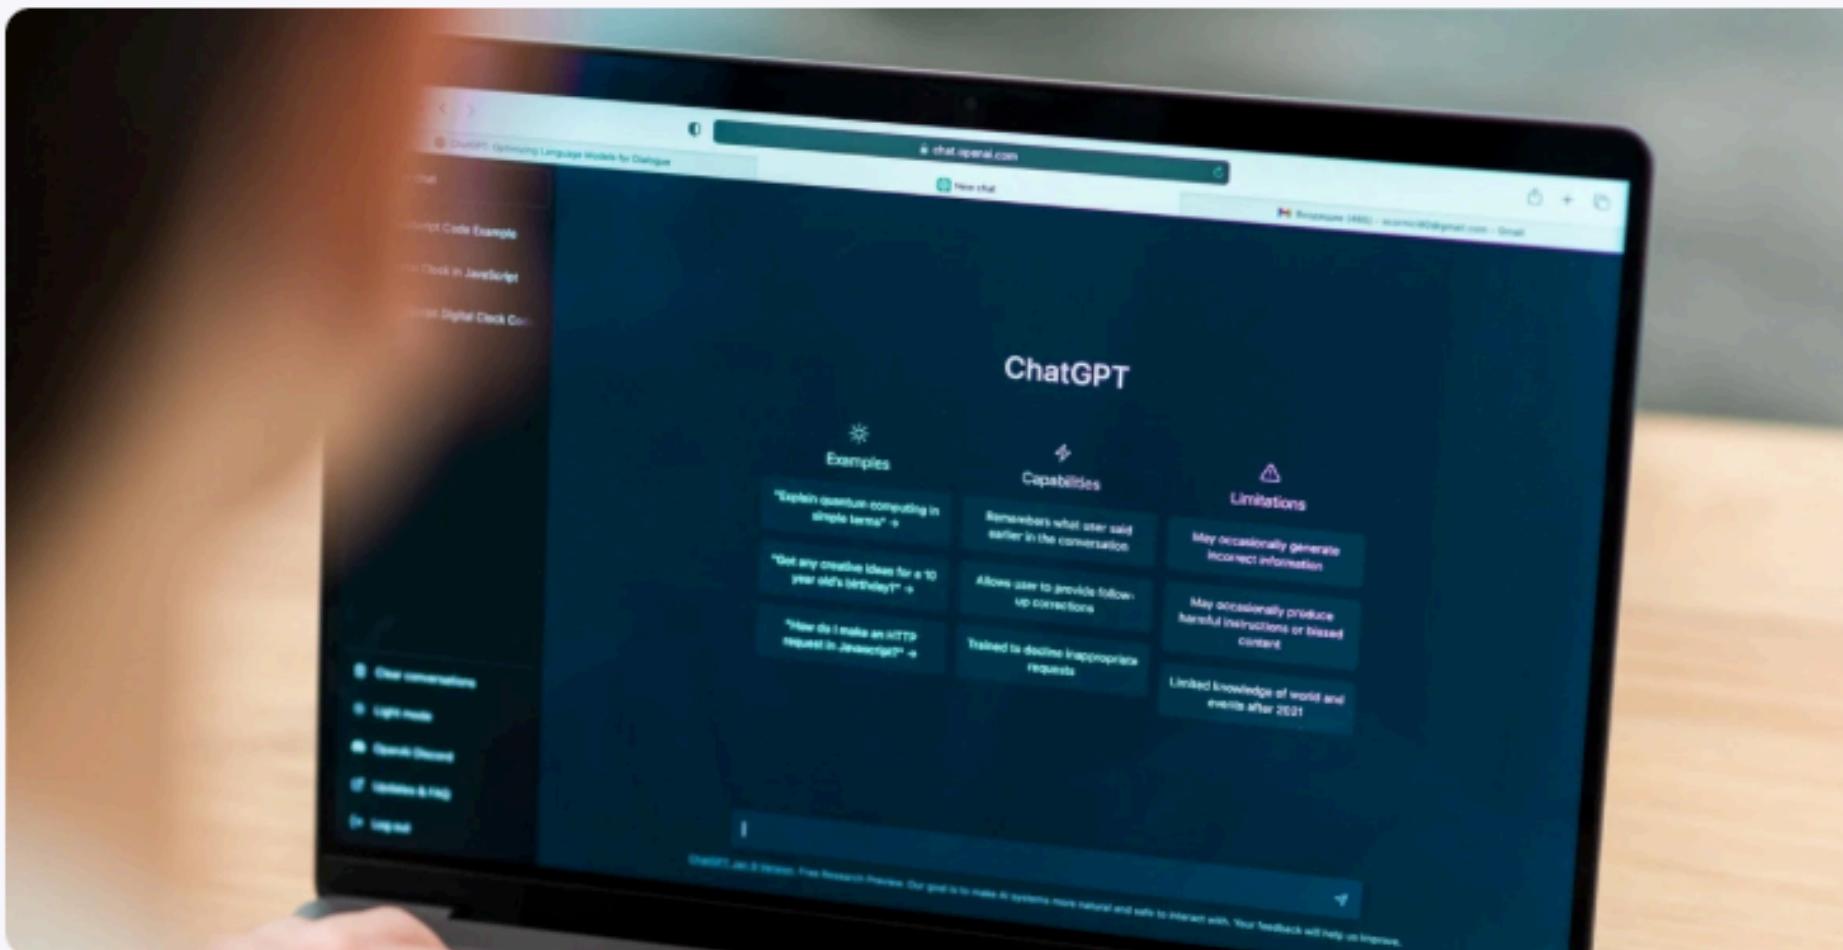

- I prompt sono proposizioni che specificano il risultato desiderato
- Guidano il modello nella generazione del testo
- Influiscono sulla qualità e la pertinenza della risposta
- IA: motore sintattico \leftrightarrow Umani: motore semantico
- Il linguaggio umano è ambiguo \Rightarrow dobbiamo «pensare» come una IA
- Input umano: minima complessità senza ambiguità
- Bisogna conoscere le regole per scrivere prompt efficaci

Prompt Engineering

- Chiarezza e specificità, evitare ambiguità
- Verbi chiari, frasi affermative
- Definire ruoli e contesto, fornire esempi
- Indicare le priorità richieste
- Definire tono, stile e formato
- *Chained prompting*
- *One-shot prompting*
- Tener conto dei limiti dell'IA
- Non dare per buone le risposte!
